

# **S600**

# Geared up for fun

# **Preface**

### Purpose of this document

This White Paper will be published in several revisions as the phone is developed. Therefore, some of the headings and tables below contain limited information. Additional information and facts will be forthcoming in later revisions.

The aim of this White Paper is to give the reader an understanding of the main functions and features of the phone.

Note: This document contains general descriptions for this specific Sony Ericsson mobile phone.

People who can benefit from this document include:

- Operators
- Service providers
- Software developers
- Support engineers
- Application developers

This White Paper is published by:

# **Product overview**

The S600 has a swivel action form factor and is full of nuances. Most usability is in closed mode and when needed, quick access to the ergonomic keypad is at your fingertips with the automatic swivel function for fast texting, typing in phone numbers or searching for particular media files. For synchronisation or transferring of files between the phone and a computer, a USB cable is provided in the kit.

You can store audio CD tracks in the phone or tune in to your favourite radio channel for music on the go. Catch the action in stills or capture it on video. There are wide-screen games backed up by external stereo speakers and console-like game buttons. For games developed for vertical game play you open up the S600 90 degrees and play them in angled gaming style instead. The fun stuff – pictures, themes, ringtones, music and videos – can be downloaded from web sites. Besides all the wappages out there, the S600 supports real Internet browsing letting you visit the Web sites you can't do without.

The S600 is geared up for fun. Are you?

**Note:** To be able to give updated information about the implemented technology and functionality of this product as soon as possible, this White Paper will be released in updated revisions.

### **Key features**

#### 1.8 inch colour screen

The 1.8 inch (176 x 220 pixels) full graphic 262k colour screen enhances viewing of high-quality content in the phone.

#### 1.3 Mega pixel camera

With the 1.3 Mega pixel camera which includes 4x digital zoom and many user friendly features, taking pictures becomes easy and fun. The horizontal user interface adds a natural feel when it comes to handling the camera.

#### Communicorder

By using the built in communicorder, a video recording can be captured and stored in the phone. A video clip can be shared as a picture message with friends or family. The S600 supports viewing video clips in full screen mode.

### **Built in photo light**

Lighting conditions can be enhanced by using the built in photo light which is easily started from the settings menu when using the camera.

#### Style-Up™ covers

Change the look of the phone by switching covers to different styles and colours.

Style-up" Cover

#### Gaming

Gaming is a very popular feature in mobile phones, and with Java™, users can download new games and skill levels to further enhance the entertainment experience. Several embedded games are included in the phone at purchase and two added action buttons to intensify the experience for the user whilst gaming.

# Game buttons

#### Java™

Download additional applications which are, for example, information- and entertainment- based. This gives users a chance to personalize the functions and features in their phones, and developers the opportunity to create new applications.

#### **HTML** web browser support

Browse the Internet and look at the web sites in a different way with Access NetFront 3.3 – An HTML browser which supports a complete web standard suite.

#### Disc2Phone

Transfer music from a computer to the phone by using Disc2Phone software. Search for and select music on your computer or audio CDs and convert your existing audio tracks to MP3 format. Disc2Phone will be included on the CD in the box.

#### Media player

Enjoy the phone as a portable music and videoplayer. It is possible to play music and video clips, streamed or downloaded and the folder system enables, for example, organizing favourite songs into groups and creating simple playlists. A play and pause function has been added to simplify listening. The media player supports MP3, AAC, MIDI, WAV and XMF formats.

#### **RDS FM Radio**

The FM radio with RDS (Radio Data System) offers instant and easy access to FM radio channels. The RDS function brings information directly to the display, which is sent out by the currently tuned in radio station. Just plug in the handsfree that works as an antenna and start listening to desired music. The radio can also be used as an alarm signal.

#### Stereo widening

The Stereo Widening and Mega Bass™ effects improves the sound experience when listening to music through the external stereo speakers or the stereo headphones that comes with the phone.

# Bluetooth™ wireless technology Several devices (simultaneous Bluetooth of

Several devices (simultaneous Bluetooth connections) can be connected to S600 using Bluetooth wireless technology up to 10 metres away. For example, the phone can be answered with a Bluetooth headset, when it rings and images can be sent to another phone at the same time. Several mobile phones can take part in a Bluetooth supported game and the phone and a computer can exchange data such as images, video clips, business ecards, music files and calendar data.

#### Personal Information Management (PIM)

Stay up to date with everyday events by synchronizing phone contacts, calendar appointments and tasks in the phone with similar programs in a computer. The USB-cable which comes with the phone, the built in Infrared or Bluetooth feature can be used together with the synchronization software which is available on the CD in the kit or can be downloaded from <a href="https://www.SonyEricsson.com/support">www.SonyEricsson.com/support</a>.

| OTA settings   | Х                                       | Х                                       |
| WAP, e-mail and other settings can be sent Over-The-Air to the phone.  |   |   |
| Photo light (built-in)   | Х                                       | Х                                       |
| When lighting conditions are poor, activate the photo light.   |   |   |
| PhotoDJ™   | Х                                       | Х                                       |
| A drawing tool in the phone where new pictures can be drawn from scratch and existing pictures and photos can be altered.                                    |   |   |
| Picture gallery  | Х                                       | Х                                       |
| A thumbnail image gallery where sections of several pictures can be seen in the display at the same time.  |   |   |
| Picture phonebook  | Х                                       | Х                                       |
| Add pictures to the contacts. When someone calls, a picture of that person appears on screen.  |   |   |
| PlayNow™   | Х                                       | Х                                       |
| Listen to music before you purchase and download to your phone.  |   |   |
| PlayNow™ Games   | Х                                       |   |
| Preview games straight from the phone desktop in three clicks before you purchase and download.  |   |   |
| Polyphonic voices  | 40                                      | 40                                      |

| Feature  | S600            | K750i           |
|--|-----------------|-----------------|
| Predictive text input  | Х               | Х               |
| QuickShare™  | X               | X               |
| QuickShare <sup>™</sup> is easy experience sharing. With an integrated camera a view can be captured and sent in seconds.  |                 |                 |
| Screensaver  | Х               | Х               |
| SIM card lock  | Х               | Х               |
| The possibility to protect the SIM card with a four-digit PIN code.  |                 |                 |
| Sleep mode   | Х               | Х               |
| A power saving feature that minimizes battery power consumed when the phone is in standby.   |                 |                 |
| SMS long (Text Messaging)  | Х               | Х               |
| Concatenated text messaging. This feature must be enabled when sending text messages with pictures and sounds attached (EMS).  |                 |                 |
| Sony Ericsson Remote Update Service  | Х               | Х               |
| Download the latest version of the mobile phone software over the air.   |                 |                 |
| Sony Ericsson Update Service   | Х               | Х               |
| Connect the phone to an Internet connected computer, download the latest operator approved version of the mobile device software from the web, <a href="www.SonyEricsson.com/support">www.SonyEricsson.com/support</a> and update the mobile device. |                 |                 |
| Sound recorder   | Х               | Х               |
| A mini recording device in the phone that can record voice messages or other sounds.   |                 |                 |
| Speakerphone   | Х               | Х               |
| Speed dialling   | Х               | Х               |
| Allocate contacts in the phone book to specific keys on the keypad.  |                 |                 |
| Standby Time   | Up to 400 hours | Up to 400 hours |

| Feature   | S600          | K750i         |
|---|---------------|---------------|
| Status view   | Х             | Х             |
| The display shows the network being used, time and other status information.  |               |               |
| Stopwatch   | Х             | Х             |
| Style-Up™ Covers  | Х             |               |
| Exchangeable covers.  |               |               |
| SVG Tiny 1.1  | Х             | Х             |
| Scalable Vector Graphics for impressive animated wallpapers, menus and other graphic elements.  |               |               |
| Synchronization PC  | Х             | X             |
| Synchronize and share phone content with a computer.  |               |               |
| SyncML  | Х             | Х             |
| A device communications standard that enables remote synchronization between devices.   |               |               |
| Talk Time   | Up to 9 hours | Up to 9 hours |
| Tasks   | X             | X             |
| Keeps track of important things to do.  |               |               |
| Themes display  | Х             | Х             |
| Phone menu texts and background graphics.   |               |               |
| Timer   | Х             | Х             |
| Set the phone to alert after a specific time lapse.   |               |               |
| USB connectivity support  | Х             | Х             |
| Connect the phone to a computer with a USB cable and the memory in the phone appears on the computer screen as a mass storage device. |               |               |
| Vibrating alert   | Х             | Х             |
| The phone vibrates when a call comes in.  |               |               |
| Video player  | Х             | Х             |
| Record, play and transfer video clips to another phone or a computer via an available transfer method.                                |               |               |

| Feature   | S600 | K750i |
|---|------|-------|
| Video streaming   | Х    | X     |
| Real time streaming of video, for example, live cam.  |      |       |
| VideoDJ™  | Х    | Х     |
| Create video sequences by combining different clips and adding music and images.  |      |       |
| Viewfinder display  | Х    | Х     |
| When using an in-phone camera or snap-on accessory camera, the picture can be previewed before it is captured.  |      |       |
| Voice control   | Х    | Х     |
| Voice answer, reject and call. Assign voice commands to items in the phone book and when a call is made, the voice command can be used instead of pressing keys.  |      |       |
| Voice mail  | Х    | Х     |
| Support for voice mail operator service including automatic answering and message recording.  |      |       |
| WAP 1.2.1   | Х    | Х     |
| A mobile Internet standard to access specially designed Internet sites.   |      |       |
| WAP 2.0 XHTML   | Х    | Х     |
| A mobile Internet standard to access specially designed Internet sites. WAP 2.0 supports colour and interactive lists.  |      |       |
| WTLS  | Х    | Х     |
| Wireless Layer Transmission Security - encrypts confidential information such as credit card and bank account numbers. Necessary for mobile banking and shopping. |      |       |

# **Facts and figures**

This chapter offers readers a detailed listing of all the technical data relating to the product. Comprehensive descriptions of performance and technical characteristics are presented in table format for quick and easy access.

# **Technical specifications**

### General technical data

| System             | Tri-band GSM phase 2 recommendations. GSM (R99) 900 (CTR 19 and CTR 20), GSM 1800 (CTR 31 and CTR 32), GSM 1900 and e-GSM mode supported. |
|--------------------|---|
| Speech coding      | HR, FR, EFR, AMR supported where available, for high speech quality.  |
| GSM SIM/ USIM card | GSM SIM - GSM 11.11, Small plug-in card, 1,8 V and 3 V.   |
| Memory (user free) | Up to 64 MB (depending on software configuration/file content)  |

### Performance and technical characteristics

| Dimension  | GSM 900/E-GSM 900                             | GSM 1800                           | GSM 1900                        |
|--|---|------------------------------------|---------------------------------|
| Frequency range (MHz)                                      | TX: 880 – 915<br>RX: 925 – 960                | TX: 1710 – 1785<br>RX: 1805 – 1880 | TX:1850 –1910<br>RX:1930 – 1990 |
| Channel spacing  | 200 kHz                                       | 200 kHz                            | 200 kHz                         |
| Number of channels   | 174 Carriers *8 (TDMA)                        | 374 Carriers *8 (TDMA)             | 299 Carriers *8 (TDMA)          |
| Modulation   | GMSK  | GMSK                               | GMSK                            |
| TX Phase Accuracy  | < 5° RMS Phase error<br>(burst)               | < 5° RMS Phase error<br>(burst)    | < 5° RMS Phase error<br>(burst) |
| Duplex spacing   | 45 MHz  | 95 MHz                             | 80 MHz                          |
| Frequency stability  | +/- 0.1ppm                                    | +/- 0.1ppm                         | +/- 0.1ppm                      |
| Voltage operation (nominal)                                | 3.6 V   | 3.6 V                              | 3.6 V                           |
| Transmitter RF power output                                | 33 dBm Class 4<br>(2 W peak)                  | 30 dBm Class 1<br>(1 W peak)       | 30 dBm Class 1<br>(1 W peak)    |
| Transmitter RF power output                                | 33 dBm Class 4<br>(2 W peak)                  | 30 dBm Class 1<br>(1 W peak)       | 30 dBm Class 1<br>(1 W peak)    |
| Transmitter Output impedance                               | 50 ohm  | 50 ohm                             | 50 ohm                          |
| Transmitter Spurious emission (according to specification) | < -36 dBm up to 1 GHz<br>< -30 dBm over 1 GHz | < - 30 dBm                         | < - 30 dBm                      |
| Receiver RF sensitivity                                    | Better than - 102 dBm                         | – 102 dBm                          | – 102 dBm                       |
| Receiver RX Bit error rate                                 | e < 2.4%                                      | < 2.4%                             | < 2.4%                          |

### **USSD** technical data

| Feature            | Support   |
|--------------------|---|
| USSD support       | GSM Phase 1/2 (Cross-phase compatibility)   |
| Mode support -mode | UI-mode supported<br>SAT initiated USSD supported   |
| UI-mode details    | <ul> <li>It is possible to scroll the text up and down in USSD messages.</li> <li>It is possible to highlight embedded numbers and take actions accordingly.</li> </ul> |

### **GPRS** technical data

| Feature  | Support  |
|--|--|
| Compatible GPRS and SMG specifications           | Release 99 according to ETSI specification.  |
| Data rates                                       | Multislot class 10 supported (4+2) CS-1, CS-2, CS-3, CS-4 9,050 bps, 13,400 bps, 15,600 bps, 21,400 bps supported (network-dependent). |
| Medium Access Modes                              | Dynamic allocation   |
| Support of Packet Control Channels (PBCCH/PCCCH) | Yes  |
| Network operation mode                           | NOM I, II, III   |
| Support of GPRS/CS combined procedures           | Yes  |
| Network control mode                             | NC0 and 2  |
| Support of access in 2 phases                    | Yes  |
| Support of PRACH on 11 bits                      | Yes  |
| Support of GPRS re-selection C31/C32             | Yes  |
| Support of static and dynamic addressing         | Yes  |
| Support of power control Uplink and Downlink     | Uplink = yes, Downlink is a network feature.   |
| Support of ciphering algorithms                  | GEA1, GEA2   |
| Support of compression algorithms                | Yes, V42bis and IP header compression.   |
| Mode of operation                                | Class B and Class C modes of operation supported.  |

| Feature               | Support  |   |  |
|-----------------------|--|---|--|
| R Reference point     | •  | Physical layer: Support of RS232 PPP is supported as L2 layer in the R reference point Authentication algorithms PAP, CHAP supported  |  |
| IP connectivity       | PDP type IP is supported IP termination in mobile or TE (lapto   | PDP type IP is supported IP termination in mobile or TE (laptop, PDA) supported   |  |
| PDP context           | PDP context description is edited vi<br>AT-command or via OTA  | 10 PDP context descriptions stored in mobile PDP context description is edited via application in mobile, AT-command or via OTA Simultaneous PDP contexts are supported, maximum 2. |  |
| SIM                   | GPRS aware, as well as non-GPRS supported.   | GPRS aware, as well as non-GPRS aware; SIM cards are supported.   |  |
| AT commands supported | AT+CGDCONT - DEFINE PDP CONTEXT AT+CGEQREQ - Quality of Service Profile (REQUESTED) AT+CGEQMIN - Quality of Service Profile (Minimum Acceptable) AT+CGATT - PACKET DOMAIN SERVICE ATTACH OR DETACH | AT+CGACT - PDP CONTEXT<br>ACTIVATE OR DEACTIVATE<br>AT+CGDATA - ENT   |  |

## **SIM AT services supported**

| Service              |        | Mode   | Support    |
|----------------------|--------|--|------------|
| CALL CONTROL BY SIM  |        |  | Yes        |
| MO SMS CONTROL       |        |  | No         |
| DATA DOWNLOAD TO SIM |        | Cell Broadcast<br>SMS                          | Yes<br>Yes |
| DISPLAY TEXT         |        | Text of up to 240 characters (120 UCS2 coded). | Yes        |
|                      | bit 1: | 0 = normal priority                            | Yes        |
|                      |        | 1 = high priority                              | Yes        |
|                      | bit 8: | 0 = clear message after a delay                | Yes        |
|                      |        | 1 = wait for user to clear message             | Yes        |

| Service                      |        | Mode  | Support |
|------------------------------|--------|---|---------|
| GET INKEY                    |        | General: The GET_INKEY requires that the user confirms his/her choice                           | Yes     |
|                              | bit 1: | 0 = digits (0-9, *, # and +) only   | Yes     |
|                              |        | 1 = alphabet set  | Yes     |
|                              | bit 2: | 0 = SMS default alphabet  | Yes     |
|                              |        | 1 = UCS2 alphabet   | Yes     |
|                              | bit 3: | 0 = character sets defined by bit 1 and bit 2 are   | Yes     |
|                              |        | — enabled   | Yes     |
|                              |        | 1 = character sets defined by bit 1 and bit 2 are disabled and the Yes/No response is requested |         |
| GET INPUT                    |        | General: No. of hidden input characters   | 252     |
|                              | bit 1: | 0 = digits (0-9, *, # and +) only   | Yes     |
|                              |        | 1 = alphabet set  | Yes     |
|                              | bit 2: | 0 = SMS default alphabet  | Yes     |
|                              |        | 1 = UCS2 alphabet   | Yes     |
|                              | bit 3: | 0 = ME may echo user input on the display   | Yes     |
|                              |        | <ul><li>1 = user input not to be revealed in any way (see note)</li></ul>                       | Yes     |
|                              | bit 4: | 0 = user input to be in unpacked format   | Yes     |
|                              |        | 1 = user input to be in SMS packed format   | Yes     |
|                              | bit 8: | 0 = no help information available   | Yes     |
|                              |        | 1 = help information available  | Yes     |
| LAUNCH BROWSER               |        |   | Yes     |

#### **User Interaction with SIM AT**

#### **Display text**

Text of up to 240 characters (120 UCS coded) is supported.

Text clearing times are 5-20 seconds and a 60-second time-out limit for the user to clear the text. 'Key' responses:

- 'Long Back' Proactive session terminated by user.
- 'Back' Backward move in proactive session.

Any other key clears the display if the command is performed successfully.

#### **Get inkey**

Prompt for a one-character input. Pressing 'Ok' without entering a character gives warning message "Minimum 1 character". 'Key' responses:

- 'C' clears current character.
- 'Long Back' terminates the proactive session.
- 'Back' Backward move in proactive session.
- 'OK' Command performed successfully.

#### **Get input**

Prompt for character input. The phone will refuse to accept further input when maximum response length is exceeded. UI Maximum Response lengths:

- Digits Only 160 characters.
- SMS default alphabet characters 160 characters.
- Hidden Characters (digits only) 20 characters.

#### 'Key' responses:

- 'C' clears current character.
- 'Long Back' terminates the proactive session.
- 'Back' Backward move in proactive session.
- 'OK' Command performed successfully.

#### Select item

Scroll to highlight item for selection. 'Key' responses:

- Navigational key press down Scroll down list.
- Navigational key press up Scroll up list.
- · Long 'Back' terminates proactive session.
- 'Back' Backward move in proactive session.
- 'OK'- Command performed successfully.

#### Send short message

Default message "Sending message, please wait" can be replaced for the Alpha Identifier text, or suppressed completely if a null text is provided.

Default responses are "MESSAGE FAILED" or "MESSAGE SENT". 'Key' responses:

Long 'Back' or 'Back' ends the proactive session.

#### Set up call

If the ME is on a call when the command 'Set up Call', 'putting all other calls on hold' is sent, the user will see the text 'Setting up a call current call will be held'. If 'OK' is pressed the current call will be put on hold and the new call set up. If the ME is on a call when the command 'Set Up Call, disconnecting all other calls' is sent, the user will see the text 'Setting up a call current call will be disconnected'. If the 'OK' key is pressed the current call will be disconnected and the new call set up.

#### Set up menu

Incorporates a SIM Application Toolkit Menu Item into the ME's main menu structure.

If an Alpha Identifier is supplied in the Set Up Menu command, this is used as the SIM AT entry in the ME's main menu. If no alpha identifier is supplied and several items are found in the menu, a default title is used. If the SIM AT Menu Item is selected by pressing 'Select', all the items sent in the Set Up Menu command will be available for selection, in the same way as the Select Item command.

| Feature   | Support   |
|---|---|
| Supported ways for replying to a received SMS:                                      |   |
| via SMS   | Yes   |
| via MMS   | Yes   |
| via Email   | Yes   |
| via phone call (set up a call to the number contained in the message body)          | Yes   |
| via WAP call (go to the WAP address contained in the message body)                  | Yes   |
| via USSD session  | No  |
| Possibility to offer the user the ability of sending an SMS to a list of recipients | Yes, using groups in Contacts or adding multiple separate recipients. |
| Possibility to write an email address as a recipient address                        | Yes, if SMS type = email.   |
| SMS storage   | On the SIM and in the phone.  |
| Nokia Picture Messaging   | Yes   |

## **Enhanced Messaging Service**

| Feature  | Support  |
|--|--|
| Level of compliance supported by the handset regarding the specifications described in release 99. | Enhanced Messaging Service (EMS) according to the standard 3GPP™ TS 23.040 v4.3.0, with the addition of the ODI feature from 3GPP™ TS 23.040 v5.0.0.   |
| Number of messages that the handset is able to handle to generate a concatenated message           | 20   |
| Capacity storage   | 200 and the space left on the SIM card.  |
| Outgoing messages  | It is possible to  • see how many short messages an EMS message consists of before sending it.  • choose whether to send the message or not after writing it.  |
| Incoming messages  | <ul> <li>A signal is heard once all parts of the message have been received or when a timeout occurs.</li> <li>It is possible to re-use the content of an EMS message. Sounds, pictures, and animations can be inserted in a new message, if the object is not protected using ODI.</li> </ul> |
| Concatenated messages  | A receipt is received in the handset when all parts of a concatenated message have been delivered.   |

| Feature   | Support   |  |
|---|---|--|
| Insert objects  | It is possible to add pictures, animations and sounds to an EMS message.  |  |
| Sounds  | Chimes high, chimes low, ding, tada, notify, drum, claps, fanfare, chords high, chords low.   |  |
| I-melody  | Yes, version 1.2.   |  |
| Melodies  | <ul> <li>It is possible to</li> <li>send and receive melodies via EMS, if the melodies are not protected by copyright.</li> <li>download melodies and commercial tunes from WAP/WAP portals.</li> <li>create melodies on WAP/WAP portals.</li> </ul>  |  |
| WBMP  | Yes   |  |
| Picture sizes   | 16x16 mm, 3 x32 mm, variable size in black and white.   |  |
| Pictures  | It is possible to  edit pictures by using the phone keypad.  send and receive pictures via EMS, if the pictures are not protected by copyright.  create pictures on WAP/WAP portals.  download pictures from WAP/WAP portals.  receive pictures in enhanced messages originated by service providers. |  |
| Animations  | The handset supports the following animations: Angry, Crying, Flirty, Happy, Kiss, Sad, Tongue, Wow, Confused, Devil, Glasses, Indifferent, Laughter, Sceptical and Wink. Plus the other nine animations defined in 3GPP™ TS 23.040 v4.3.0.  It is possible to  • send and receive animations.        |  |
| TP-PID field value given by the handset before sending an EMS message | 0x00  |  |

## **Multimedia Messaging Service**

| Feature   | Support  |
|---|--|
| MMS/CSD parameters and MMS/GPRS parameters placement            | MMS is bound to a WAP profile. A WAP profile is bound to a Data Account. A Data Account contains either CSD parameters or GPRS parameters. |
| Possibility to pre-configure the MMS parameters in factory      | <ul><li>MMS/CSD: Yes</li><li>MMS/GPRS: Yes</li></ul>   |
| Possibility to configure the MMS parameters by OTA provisioning | MMS/CSD: Yes     MMS/GPRS: Yes   |

| Feature   | Support   |
|---|---|
| Possibility for all the parameters from the parameters set to be OTA provisioned at the same time                           | <ul><li>MMS/CSD: Yes</li><li>MMS/GPRS: Yes</li></ul>  |
| Possibility for only one parameter from the parameters set to be OTA provisioned  | MMS/CSD: No     MMS/GPRS: No  |
| OTA provisioning solution   | OTA Settings Specification v7.1 © Ericsson and Nokia  |
| Supplier indication of realized interoperability tests between its MMS User Agent and MMS Relay/Server from other suppliers | Yes   |
| Support of a standard or a proprietary procedure for OTA provisioning of MMS parameters                                     | Proprietary   |
| Functionalities that the user is able to set during message composition:  | <ul> <li>message subject</li> <li>message priority</li> <li>email recipient address</li> <li>message Cc recipient(s) address(es)</li> <li>delivery report request</li> <li>read report request</li> <li>MSISDN recipient address</li> </ul>                 |
| From where can the user insert multimedia elements into multimedia messages:  | <ul> <li>File Manager</li> <li>directly from camera</li> <li>Contacts</li> <li>Calendar</li> </ul>  |
| Possibility for sent messages to be memorized into a folder in handset memory   | Yes   |
| Actions that the user can perform after message notification:   | <ul><li>Auto Download</li><li>Always Ask</li></ul>  |
| Actions that the user can perform after message retrieval:  | <ul> <li>reply to the sender of the message SMS/MMS</li> <li>reply to the sender and to Cc people SMS/MMS</li> <li>forward the message MMS</li> <li>delete the message</li> <li>save message into terminal</li> <li>call the sender of a message</li> </ul> |
| Multimedia codecs/formats supported for audio   | AMR   |
| Multimedia codecs/formats supported for video   | MPG4, 3GPP™, SDP  |
| Multimedia codecs/formats supported for image   | JPEG, GIF87, GIF89A, PNG, SVG, WBMP, BMP  |
| Supported formats for message presentation:   | <ul> <li>message body + attachments (email presentation)</li> <li>SMIL version as described in OMA MMS IOP document version 1.2</li> </ul>  |

| Feature   | Support   |
|---|---|
| Maximum message size that can be handled by the handset for message | Content Class and Creation mode are applied. Also maximum size is possible to customize.  |
| MMS User Agent will report problems to user in case of:             | <ul> <li>message not sent causes no user subscription to service, if included in ResponseText (please see WAP209)</li> <li>message not sent causes required functionality not supported by MMS Relay/Server, if included in ResponseText (please see WAP209)</li> <li>message not sent causes insufficient credit (in case of prepaid charging), if included in ResponseText (please see WAP209)</li> </ul> |

### Bluetooth™ technical data

| Feature                        | Support  |
|--------------------------------|--|
| Bluetooth capability statement | This phone is manufactured to meet Bluetooth Specification 2.0   |
| Bluetooth profiles             | Basic Imaging Profile Dial-up Networking Profile File Transfer Profile Generic Access Profile Generic Object Exchange Profile Handsfree Profile Headset Profile Human Interface Device (HID) Profile Object Push Profile Personal Area Network Profile Serial Port Profile Synchronization Profile SyncML OBEX binding |
| Connectable devices            | All products supporting Bluetooth $^{\text{TM}}$ spec. 1.1, or higher, and at least one of the profiles above.   |
| Coverage area                  | Varies due to radio performance on remote device and the occurrence of obstacles. Up to 10 metres (33 feet).   |
| Transmission power             | 2mW (3 dBm)  |
| Frequency band                 | 2.4 GHz - the unlicensed ISM band.   |
| Power consumption              | GSM host processor excluded:  Standby, Bluetooth On mode: <0.9mA  Voice mode: 24 mA  Data mode average: 25mA   |
| Data transmission rate         | Up to 600 kbps asynchronous and up to 350 kbps synchronous from an application level.  |

# SyncML technical data

| Feature   | Support for Sync ML  |
|---|--|
| SyncML compliance   | The handset is fully SyncML 1.1 compliant (it passed SyncML  |
| Gynowic compliance  | Conformance testing).  |
| Basic data formats  | Contacts: vCard 2.1, Calendar: vCalendar 1.0, vTasks v1.0, vTodo v1.0, Notes: text/plain   |
| Possibility for operators to extend SyncML functionality.   | No   |
| Possibility to synchronize other handsets using SyncML.   | No   |
| Transport method for SyncML messages.   | HTTP, WSP (i.e. using a WAP connection), OBEX (IR, USB, Bluetooth)   |
| Synchronization application placement.  | Inside the handset.  |
| Possibility for the user to configure login parameters (e.g. username and password) to access the remote database.  | Yes  |
| Configuration parameters that can be entered/modified by the user.  | Server URL, Server UserID, Server PWD, Paths to databases (Calendar, Contacts, Tasks and Notes) UserID and PWD for Databases, Databases to be synchronized (on/off), WAP Account, Synchronization interval and Remote initiation. Can be provisioned with Ericsson Nokia OTA Settings Specification v7.1 and OMA Client provisioning v1.1. |
| Mechanisms used by the handset to capture changes made by the end user (i.e. how does the SyncML client in the handset know which changes were made to the address book). | It uses a change log where it marks the contact as updated.  |
| Ability to deal with multiple servers.  | Yes  |
| Ability to perform conflict resolution actions.   | No   |

### Web browser technical data

| Feature               | Support in the browser                   |
|-----------------------|--|
| Back to previous page | Yes                                      |
| Bearer type GPRS      | Yes                                      |
| Bearer type GSM Data  | Yes, HSCSD, ISDN and analog.             |
| Bookmarks             | Yes, with folders and sorting supported. |

| Feature                  | Support in the browser   |
|--------------------------|--|
| Bookmark Export/Import   | Yes, can be sent and received using vBookmark format via Infrared, Bluetooth™, SMS, MMS and email.   |
| Cache                    | Yes (size 300 kB).   |
| Character sets *         | UTF-8 (Default), UTF-16, USASCII, Latin1, UCS2.  |
|                          | *) When creating WML applications, it is recommended to always save the page contents as UTF-8, and that this is clearly indicated in the pages before publishing. This ensures that the contents of the application can be viewed, regardless of character sets used in gateways and the phone. All characters are not supported in all phones. The software version depends on which market the phone is associated to. Also, please note that the phone may not support input on a WAP Service which uses certain characters (languages), even if those characters are supported for browsing in the phone. |
| Clear cache              | Yes  |
| Colour                   | Colour display   |
| Home page                | Yes, up to 10 different; one for each Internet profile.  |
| HTML version for browser | XHTML, Mobile Profile 1.2  |
| Hyperlinks in Text       | Yes  |
| Hyperlinks in Images     | Yes  |
| Image Animation          | Yes  |
| Image Formats            | GIF (interlaced and non-interlaced) WBMP, no transparent layers, JPEG, PNG, BMP and SVG.   |
| Network Settings         | Up to 10 different settings available by selecting profile (Internet, Banking, Gateway etc.).  |
| OTA Support              | Yes  |
| PPP Authentication       | PAP, CHAP supported.   |
| Reload page              | Yes  |
| Security                 | WTLS class 1-3 TLS version 1, Client authentication SSL version 3, Client authentication WIM on SIM ICC X.509 certificate support, WAP Profile WPKI OTA download of trusted certificates   |
| Tables                   | Yes  |
| User Agent Profiles      | Yes, list of client characteristics - for example display size.  |
| WAP/WML WAP *            | WAP 2.0/WML 1.3  |
| Internet profiles        | Dynamic - up to 10 internet profiles, each with its own settings.  |

# Operator technical data

| Feature                   | Support for browser   |  |  |
|---------------------------|---|--|--|
| Web browser               |   |  |  |
| Version                   | 2.0 baseline  |  |  |
| HTML                      | XHTML Mobile Profile  | XHTML Mobile Profile   |  |
| Access NetFront 3.3       | <ul> <li>HTML 4.01, XHTML 1.1 Including mobile profile</li> <li>CSS 1 &amp; CSS 2 (Partial)</li> <li>ECMAScript 3rd edition (equal to Java script 1.5)</li> <li>DOM level1, level2 and Dynamic HTML (Partial)</li> <li>Graphic Formats: GIF, Animated GIF, JPEG, Progressive JPEG, PNG, MNG, BMP, WBMP</li> </ul> |  |  |
| PROVISIONING              |   |  |  |
| Provisioning types        | The Ericsson-Nokia OTA solution Over the Air Settings Specification, v7.1 © Ericsson and Nokia  | OMA Client provisioning (v1.0)   |  |
| Total Parameter sets      |   | 10 (shared between the provisioning types). < or = 10 (total number of profiles).  |  |
| Parameter set list        | name, homepage and homepage title (1st bookmark element), proxy/GW address, bookmarks (remaining bookmark elements), CSD phone number, CSD data rate, CSD dial type, GPRS APN, protocol authentication, GW authentication on/off  | name, homepage, proxy/GW address, CSD phone number, CSD data rate, CSD dial type, CSD response timer, GPRS APN, protocol authentication, GW authentication, GPRS QoS |  |
| Parameter sets include    | CSD, GPRS (different sets).   | CSD, GPRS (different sets).  |  |
| Factory pre-configuration | CSD, GPRS (possibility to le  | CSD, GPRS (possibility to lock a setting).   |  |
| OTA                       | CSD, GPRS configuration p   | CSD, GPRS configuration possible.  |  |
| Security mechanism        |   |  |  |
| Bearer                    | The Ericsson-Nokia solution   | OMA Client Provisioning  |  |

| Feature                        | Support for browser  |   |
|--------------------------------|--|---|
| OTA via SMS                    | Operator verification through a code that can be included in the OTA configuration data. This code is shown to the user who can choose to install or not.  | Uses security mechanism (SEC) methods according to WAP-183-ProvCont-20010724-a (see www.openmobilealliance.org).  |
| Interface                      |  |   |
| Bearer                         | The Ericsson-Nokia solution  | OMA Client Provisioning   |
| OTA via SMS                    | A question whether to install, with the code if available is asked. The user may have to choose to create a new profile or to replace an existing profile. | For NETWPIN the user is asked to accept to install received settings. For USERPIN, USERNETWPIN and USERPINMAC the user is subsequently asked to enter a PIN code that is a shared secret between the service provider and the user. |
| OTA via Cell Broadcast         | -  | The user is asked whether to accept the received settings or not.   |
| Re-provisioning Interface      | The Ericsson-Nokia solution  | OMA Client Provisioning   |
| OTA via SMS                    | Same interface as above.   | If the settings previously installed were privileged or have higher priority, the settings might not be possible to install again unless the terminal is reset, otherwise as above.   |
| OTA via Cell Broadcast         |  | If the settings previously installed were privileged or have higher priority, the settings might not be possible to install again unless the terminal is reset, otherwise as above.   |
| Carrier reset/provisioning     | Yes, but not if the set is pre-configured in the factory and locked.   |   |
| SWIM                           | Not used for provisioning.  The SWIM is only used for security, both WTLS connections and digital signatures.  |   |
| SWIM certificate               | Both client and trusted certificates can be used for WTLS connections and digital signatures.  |   |
| Applicative provisioning       |  |   |
| Preferred bearer customization | Yes  |   |
| Email customization            | Yes, but not through provisioning.   |   |
| Other applications/features    | Yes (MMS, SyncML, Wireless Village).   |   |
| Technologies                   |  |   |
|                                |  |   |

| Feature   | Support for browser   |
|---|---|
| OMA Client provisioning                             | Yes, provisioning document v1.0.  |
| Openwave OTA  | No  |
| Other   | Yes. The Ericsson-Nokia solution. OTA Settings Specification v7.1.  |
| Provisioning bearer                                 | SMS, Cell Broadcast   |
| Parameter sets available                            | < or = 10 (total number of Internet profiles)   |
| Parameter sets for OTA modification                 | < or = 10 (total number of Internet profiles)   |
| PUSH  |   |
| Content types                                       |   |
| Service Indication (SI)                             | Yes   |
| Service Loading (SL)                                | Yes   |
| Cache Operation (CO) content type                   | Yes   |
| Session Initiation Application (SIA)                | Yes   |
| Man Machine Interface                               |   |
| SI/content retrieval postponing                     | Yes   |
| SI menu structure accessability                     | Messaging, Inbox  |
| SL reception warning                                | The user can make a choice if a dialogue is wanted or not before loading the SL.  Messaging/Settings/Push/Allow push msg/Always ask |
| SIA reception warning                               | Yes   |
| Cache size limitations                              | The oldest push in the inbox will be discarded.   |
| Number of push messages                             | Depending on the size of the push messages. Around 20 push messages with a size of 500 bytes can be stored.                         |
| Push de-activate                                    | Yes (Messaging/Settings/Push/Allow push msg).   |
| Dynamic push menu changes                           | No. There are no changes in the menus when activating/deactivating push.  |
| Security  |   |
| Mechanisms for push                                 | None  |
| Trust with PPG                                      | Sending a SIA is the most trustful.   |
| WSP push sessions                                   | The White List is supported.  |
| Denial of service/spoofing                          |   |
| User agent profile                                  |   |
| UA profile content sent at beginning of WSP session | No  |

| Feature   | Support for browser   |
|---|---|
| OA profile content size   |   |
| URL sent pointing to the UA profile at the beginning of WSP session | Yes   |
| URL location  | On the manufacturer Internet site.  |
| WTAI  |   |
| WTA Make Call   | Yes   |
| WTA Send DTMF   | Yes   |
| WTA Add Phone Book  | Yes   |
| DOWNLOAD  |   |
| HTTP GET solution to download content                               | Yes   |
| Other download content  | Yes. No download limit when using HTTP protocol.  |
| Download application/product memory check                           | Yes   |
| Downloaded object solution  | Yes. The user is informed where the content is saved and asked if it should be used at once or later. |
| UAP indication for downloading                                      | Yes   |
| Other features  | Yes. Store, delete, forward, use, manage.   |
| Object formats  | Formats supported in the phone.   |
| GRAPHICAL USER INTERFACE  |   |
| Man Machine Interface   |   |
| Selection keys  | Yes   |
| Separate/dedicated back or erase keys                               | Yes   |
| Display backlight on when browsing                                  | Yes   |
| Predictive writing  | Yes   |
| "http://" string displayed automatically when entering URLs         | Not displayed but the "http://" is added automatically to the URL.                                    |
| Elements  |   |
| Pop-up menus  | Yes, in XHTML.  |
| Radio buttons   | Yes, in XHTML.  |
| Check boxes   | Yes, in XHTML.  |
| Buttons   | Available as XHTML form controls.   |

Circuit Switched Data

#### **DRM**

Digital Rights Management; controlling copying and distribution of contents, with respect to intellectual property rights.

#### **DTMF** or Touch Tone

Dual Tone Multi-Frequency signal – codes sent as tone signals. Used for telephone banking, accessing an answering machine, etc.

#### e-GSM

Extended GSM. New frequencies specified by the European Radio Communications Committee (ERC) for GSM use when additional spectrum is needed (Network-dependent). It allows operators to transmit and receive just outside GSM's core 900 frequency band. This extension gives increased network capability.

#### **EFR**

Enhanced Full Rate, speech coding.

#### **EMS**

Enhanced Messaging Service. Allows the user to add simple pixel pictures and animations, sounds and melodies to a text message. The EMS 3GPP™ standard also includes text formatting.

#### **ETSI**

European Telecommunications Standards Institute.

#### **FM**

Frequency Modulation of the (radio) carrier wave.

#### FR

Full Rate, speech coding.

#### **GIF**

**Graphics Interchange Format** 

#### **GPRS**

General Packet Radio Services

#### **GSM**

Global System for Mobile Communications. GSM is the world's most widely-used digital mobile phone system, now operating in over 100 countries around the world, particularly in Europe and Asia-Pacific.

The GSM system family includes GSM 850, GSM 900, GSM 1800 and GSM 1900. There are different phases of roll-out for the GSM system and GSM phones are either phase 1 or phase 2 compliant.

#### HR

Half Rate, speech coding.

#### **HSCSD**

High Speed Circuit Switched Data

#### **HTML**

HyperText Markup Language

#### **HTTP**

HyperText Transfer Protocol

#### **IrDA**

Infrared Data Association

#### **JPEG**

Joint photographer expert group

#### MIDI

Musical Instrument Digital Interface

#### ME

Mobile Equipment

#### MMI

Man-Machine Interface, See Ul.

#### MP3

Short for "MPEG-1 layer 3", an effective audio coding scheme.

#### MPEG4/MPG4

MPEG-4 extends the earlier MPEG-1 and MPEG-2 algorithms with synthesis of speech and video, fractal compression, computer visualisation and artificial intelligence-based image processing techniques.

#### MT

Mobile Termination

#### **ODI**

Object Distribution Indicator

#### **OMA**

Open Mobile Alliance

#### **OTA**

Over-the Air Configuration. To provide settings for the phone by way of sending an SMS message over the network to the phone. This reduces the need for the user to configure the phone manually.

#### **PDA**

Personal Digital Assistant

#### **PDP**

Packet Data Protocol

#### **PIM**

Personal Information Management

#### **PNG**

Portable Network Graphic

#### **RTSP**

Real Time Streaming Protocol session control.

#### SI

Service Indication

#### SL

Service Loading.

#### SIM card

Subscriber Identity Module card – a card that must be inserted in any GSM-based mobile phone. It contains subscriber details, security information and memory for a personal directory of numbers. The card can be a small plug-in type or credit card-sized, but both types have the same functions. The phone uses the small plug-in card.

#### **SMS**

Short Messaging Service. Allows messages of up to 160 characters to be sent and received via the network operator's message centre to a mobile phone.

#### **SP-MIDI**

SP-MIDI stands for Scalable Polyphony MIDI.

#### SS

Supplementary Services

#### SSL

Secure Socket Layer

#### **TLS**

Transport Layer Security

#### UI

User interface

#### **URL**

Uniform Resource Locator.
The global address of documents and other resources on the World Wide Web.

#### **USSD**

**Unstructured Supplementary Services Data** 

#### vCard

vCard automates the exchange of personal information typically found on a traditional business card, for use in applications such as Internet mail, voice mail, Web browsers, telephony applications, call centres, conferences, PIMs /PDAs, pagers, fax, office equipment, and smart cards. vCard is specified by IETF.

#### **VGA**

Video Graphics Array

#### **WAP**

Wireless Application Protocol. Handheld devices, low bandwidth, binary coded, a deck/card metaphor to specify a service. A card is typically a unit of interaction with the user, that is, either presentation of information or request for information from the user. A collection of cards is called a deck, which usually constitutes a service.

#### **WAP Application**

A collection of WML cards, with the new context attribute set in the entry card.

#### **WAP** service

A WML application residing on a web site.

#### **WAV**

Windows media audio.

#### **WBMP**

Wireless BitMap.

A graphic format optimized for mobile computing devices.

#### **WML**

Wireless Markup Language. A markup language used for authoring services, fulfilling the same purpose as HyperText Markup Language (HTML) does on the World Wide Web (WWW). In contrast to HTML, WML is designed to fit small handheld devices.

#### **WMLScript**

WMLScript can be used to enhance the functionality of a service, just as, for example, Java Script may be utilized in HTML. It makes it possible to add procedural logic and computational functions to WAP-based services.

#### **WSP**

Wireless Session Protocol

#### **WTLS**

Wireless Transport Layer Security

#### **WWW**

World Wide Web

#### **XHTML**

Extensible HyperText Markup Language
